Marcelo Larrosa
Web Designer

I offer 7 years of experience in the web design/development field. Currently deep diving into Wordpress theme customizations using Bootstrap and PHP, getting to know the built in functions of Wordpress, general structure and files, making use of "The Loop", and adding new script and style files to the core.

- Netsuite CRM
- Wordpress CMS
- Bootstrap
- NodeJS (for using npm, running gulp)
- Adobe Photoshop
- Adobe Illustrator
- Inkscape
- XAMPP
- Knowledge of SEO, Digital Marketing, Google Ads.

WORK EXPERIENCE

Company: SuiteDB - 8 months (Feb 2020 - Oct 2020)

- SuiteDB is a company that also works with Netsuite, my responsibilities were very similar to the ones I had in Tavano Team.

Company: Tavano Team - 4 years (2015 - 2019)

Working in Tavano Team was an excellent experience that challenged my web design knowledge and skills. I had the amazing opportunity to learn NetSuite, one of the most important CRM Software for Ecommerce platforms in the world.

My Responsibilities working in Tavano Team:

- Implement a new Theme (template) within NetSuite, that would be used to redesign the entire website, while the current one remains published without suffering any unwanted changes.
- Modify all the styles of the site, based on the aesthetic guidelines defined by the client.
- Investigate functionalities and integrate them into NetSuite so that they work correctly alongside existing functionalities and NetSuite's default code.
- Create and / or modify as the case may be, design elements (modify logo, banners, sliders, images, sections) following the same aesthetic guidelines already present in the corporate image of the company, and update them while the client site is live.
- Code simple Frontend scripts so that the visual structure is maintained regardless of what content is populated on NetSuite's backend.

Company: Solcre Technology Solutions - 2 years (2013 - 2014)

- Validation of HTML and CSS Code and finding errors.
- Use of templates to create website according to customer needs. Use the CMS developed by the company called Columnis.
- Basic programming with Javascript and jQuery. Debugging errors in scripts.

EDUCATION

Technical Schoool of Communication & Graphic Design (UTU)
2 years - 2013 - 2014

Great course in which I learnt how to think about design as a communication tool beyond the aesthetic aspect, and the importance of achieving a balance between both.
